

## Product Information AP Purafoam

Purafoam is a strong, long cling, deep cleaning alkaline foam to remove organic dirt from agricultural buildings. Long adhesion time and superb sequestrants secure a deep entrance into the protein and fat deposits in a farm building.

### How to use:

Apply 1-2% of Purafoam with a proper foam lance connected to a high pressure cleaner to obtain the best results. Cover the surface to be cleaned with an even layer of 2 cm of foam, starting at the bottom and working up towards the ceiling. Work in blocks of approx. 5 m wide.

A contact time of up to 1 hour is advised, however do not let the product dry in.

Rinse all equipment and surfaces with water after use.

Maximum temperature : 60°C

Do **NOT** use on soft metals like aluminium or on cars, machinery etc. . For this purpose use AP Unifoam

### Packaging

25 kg blue jerrycan; 200 kg; blue drum
