

AgriPura[®]

AgriPura Water Protect is a dual-purpose product; it lowers the bacterial infection pressure (in particular the gram of negative bacteria such as E-Coli and Salmonella) and in particular stimulates the protein digestion in the animals.

Safe drinking water via organic acids for cleaning and keeping drinking water systems clean. Easy and direct to use via drinking water, in a relatively low dosage and without taste deviation.

AgriPura Water Protect is available in 3 types of Package : 25 kg Cans , 225 kg Drums and 1.000 kg IBC.

AgriPura Water Protect consists of a sophisticated combination of organic acids and minerals.

It is an intelligent product, because of the built-in buffer the pH of the drinking water goes to 4, but even with a higher dosage the pH does not drop much lower than 4.

Dosage: *) 1.5 to 2 kg per 1,000 liters of drinking water

*) before dosing with **AgriPura Water Protect**, it is advisable to thoroughly flush the pipes with a higher dosage to remove the biofilm and prevent clogging of the nipples.
