

AgriPura

AgriPura Toxin Protect is an interesting toxin binder, due to the combination of different raw materials, decent protection is offered through different routes.

Firstly, this product consists of a considerable proportion of clay minerals, these are Bentonite and Zeolite, which are known to be the clay minerals with the highest adsorption capacity: water binding, toxin adsorption capacity and also for odor binding.

Furthermore, the AP Toxine Protect consists of the following components:

- Yeast cell walls: these stimulate the immune system
- Vitamin E: minimizes the influence on the liver
- Betaine: has a positive influence on water management (osmotic cell balance)

In total the **AgriPura Toxine Protect** contains various ingredients that reinforce each other, at least the negative influence of mycotoxins is reduced, resulting in less damage to the animal.

Dosage: treatment of contaminated feed up to max. 4 kg per mton

Cattle 20 to 50 grams per animal per day

AgriPura Toxine Protect is available in 25 kg bags.
