

Product Information AgriPura Fortides

AgriPura Fortides is a broad spectrum disinfectant against bacteria, mould, yeasts and viruses

- Ideal broad spectrum disinfectant for base disinfection in agricultural buildings
- Works best at temperatures above 10°C
- A combination of actives with a symbiotic effect
- Prolonged contact time (ideally 1-2 hours) and long residual efficacy of up to 3 days ensure success also in farm buildings with high organic soiling.

How to use:

For surface and equipment disinfection:

Apply a solution of 1% Fortides with a proper foam lance connected to a high pressure cleaner to obtain the best results. The product is foaming, cover the surface with an even layer of 1-2 cm of foam, starting at the bottom and working up towards the ceiling. Work in blocks of approx. 5 m wide.

For high infection pressure use a 2% solution!

For Vehicle wheel disinfection:

Fill the disinfection bath with a 1% solution and leave for max. 2 days. When temperatures are below zero add monopropylene glycol 2-10% depending on temperature. (Refer to the AgriPura Antifrost schedule)

Packaging

25 kg Blue jerrycan; 200 kg; Blue drum

Security: Use this product safely and always refer to the Safety Data Sheet

Store above freezing point in a dry, well ventilated storage away from direct sunlight
