

## Product Information AgriPura Virall

**AgriPura Fortides Virall is a powder disinfectant with very broad efficacy**

- Powerful disinfectant with the most broad efficacy
- Works at very low temperatures
- Bactericidal at 1 % and virucidal at 2%
- 30 min contact time only; strong oxidiser, but non corrosive at max of 2%

### How to use:

#### For surface and equipment disinfection:

Apply a solution of 1-2% Virall with a proper foam lance connected to a high pressure cleaner to obtain the best results. The product is foaming, cover the surface with an even layer of 1-2 cm of foam, starting at the bottom and working up towards the ceiling. Cover also the ceiling! Work in blocks of approx. 5 m wide.

When working with a foam pistol add 400 grams of Virall to 2 l of water to make a premix. Apply this at 5-10% concentration.

#### For disinfection baths/mats and disinfection by submersing:

Add 2 kg of Virall for every 100 l of water and leave for maximum 2 days or change daily when traffic through the barrier is high. Virall contains a colour indicator that will signal when the product needs to be replaced.

### Packaging

10 kg white drum

**Security:** Use this product safely and always refer to the Safety Data Sheet

Store in a dry, well ventilated storage away from direct sunlight. Keep away from moist, after opening ensure lid is closed well to avoid moist entering the bucket.
