

Product Information AgriPura PA Des

AP PA Des is a fast acting, strong disinfectant against bacteria, mould, yeasts and viruses

- Short contact time needed (5 min to max.30 min)
- Works at low temperatures (above freezing point)
- Efficacy tested according to EN 1276, EN 1650, EN 1656/1657 and EN 14349 standards
- no residue, can be used in food industry as well as in agriculture

How to use:

For cleaning the drinking water system in an empty building:

Add 0.75% AP PA Des to the drinking water line

Leave for 2-4 hours and flush drinking water lines with fresh water afterwards

For acidification and continuous purification of the drinking water:

Add 0.01% (100 ml to 1000 l of water) to the drinking water to lower the PH and decrease biofilm growth during the round.

For surface and equipment disinfection:

Apply a solution of 0.5% AP PA Des with a proper foam lance connected to a high pressure cleaner to obtain the best results. Add 0.5% of PA BF AD to make the product foam better and more pleasant to work with (this removes the smell)

Packaging

25 kg Blue jerrycan; 200 kg; Blue drum

Security: Use this product safely and always refer to the Safety Data Sheet

Store above -20° C and below + 35° C in a dry, well ventilated storage away from direct sunlight
