

# AgriPura

**AgriPura Water Safe Wetfeed** can be used to protect "wet" animal feed, mainly to keep the yeasts and fungi under control.

**AgriPura Water Safe Wetfeed** is a NON-corrosive product.

**AgriPura Water Safe Wetfeed** is an interesting combination of organic acids; in addition to propionic acid, formic acid and by buffering with ammonia water:

ammonium formate, this product also contains a considerable proportion of benzoic acid. Thanks to this beautiful combination, this product is able to keep the yeasts and moulds under control in a safe way.

In addition, the product is of nutritional value for the animal in particular due to the combination of organic acids and the benzoic acid present.

**Dosage:** 1 to 3 kg per tonne

AgriPura Safe Wetfeed is available in drums of 225 kg and in 1.000 kg IBC's
